Dear Hiring Manager,

I am Anshu Nauwala, currently in my final year of pursuing Computer Science and Engineering at the Indian Institute of Technology Patna. I am writing to apply for the Software Engineering AMTS position at Salesforce. Throughout my academic and professional journey, I have developed strong analytical and problem-solving skills, which have been honed through rigorous coursework and extensive experience in competitive programming. My time on platforms like Codeforces, where I am a Specialist, has significantly enhanced my ability to devise efficient, scalable solutions to complex challenges.

During my internships at Siddhana Tech Private Limited and Jaadoo Mentor, I gained valuable hands-on experience in full-stack development. At Siddhana Tech, I developed both frontend and backend solutions using technologies like Framer, Chakra UI, and Re-curlly APIs. My work on subscription management systems and secure payment processing taught me the intricacies of building scalable, secure web applications. Moreover, I actively used telemetry and metrics to drive operational excellence, ensuring that the software development process was both efficient and effective. At Jaadoo Mentor, I enhanced a video calling feature using PeerJS, WebRTC, and WebSockets, which solidified my understanding of real-time communication systems.

My project experience further complements my practical knowledge. In the "Real Estate Connect and Pay" project, I utilized the MERN stack and Prisma ORM to build a real-time, secure web application, while also implementing JWT authentication and Socket.io for live chat functionality. Similarly, the "Placement Portal" project involved creating a secure login system and advanced database management using MySQL, which improved my skills in user authentication and data filtering.

Beyond my technical skills, I am a team player with a proven ability to work effectively and efficiently with others. I thrive in collaborative environments and enjoy motivating my peers to achieve common goals. My self-motivation drives me to consistently deliver high-quality work, meeting deadlines and ensuring that projects are completed on time.

I am particularly drawn to Salesforce's innovative approach to technology consulting and its commitment to delivering high-quality solutions to clients. I am confident that my technical skills, project experience, and collaborative mindset make me a strong candidate for this role. Thank you for considering my application.

Regards,
Anshu Nauwala,
Computer Science and Engineering,
